

Voice Chat for Games

Take Your Game to the Next Level

Vivox provides high quality, massively scalable voice chat for online games. With the only carrier-grade communication network for online games, Vivox is bringing voice to millions of users in more than 180 countries.

The power of voice fosters community and creates vibrant worlds where the sound of human voices replaces the clicking of keys. Vivox integrated voice chat transforms game play with immersive features, such as voice fonts and 3D positional audio. In addition, Vivox provides players with unlimited access to the player community and simple and secure management tools. Today, Vivox supports leading online games and gives them what no other voice solution can:

- ◆ Access the world's largest integrated communication network for online games.
- ◆ Voice that is clear and natural online as it is face-to-face.
- ◆ Communications that drive community, tailored to existing social structures and user interfaces.
- ◆ Simple integration.
- ◆ Team of dedicated and experienced professionals.

Integrated Voice Communications

The Vivox Network

The Vivox Network delivers proven scalability and stability to millions of users in some of today's best known games. As the only carrier-grade communications network for online games, the Vivox Network offers limitless participation and boasts dynamic resource allocation and real time optimization. The Vivox Network empowers online games with reliable, proven, and professionally managed voice technology.

Committed and Experienced Team

Vivox has expertise in communications and a passion for online games. By partnering with Vivox, developers are able to provide their players with the best voice solution quickly and with the lowest risk. The Vivox team is with the game from design to implementation through launch, never leaving the game developer or publisher to manage the communications themselves. No other online communications provider offers this depth of expertise and proven deployment history than Vivox.

Transformative Voice Features

Vivox continuously works to broaden their feature set adding functionalities that improve the player experience and create revenue opportunities for developers and publishers. In addition to the basic communication functionality of voice and instant messaging, Vivox enhances immersion and control of the game experience with features and functionality such as: voice fonts, voice mail, game to SMS messaging, mobile phone to game calls, voice session recording, advertising support and the Vivox Connector, a stand-alone out of game client designed to extend community and brand outside the boundaries of the game.
